

Answer to One:

The reason I joined Film connection was so that I could learn firsthand of what to do in the film industry, instead of sitting in a classroom all day only learning theories. I wanted to be able to go out and learn from someone who is active in the industry and teach me what will be required of me and the necessary skills to be able to work in the film industry itself and so far with my mentor, I am learning just that. Just so far I have been able to watch and learn how to interact with the talent, how to handle clients for things like making commercials or videos for them, as well just the basis of the industry itself. Admittedly the reason I came to the program was for the hands on work and did not expect the online bookwork but can do my best to persevere through that as bookwork is not my strong suit.

Once I am fully into the industry I want to become a director, to be able to make films for people to enjoy and watch whether it be at home or in the theaters. I know I have to start out small and try to make a name for myself but this is what I want and I will do anything to make my dream a reality. Even then just being able to work in the film industry is awesome to me, I do not mind if I end up as an editor, or some other place that is on set, as it is where I belong.

The way I plan on getting through all of this is mainly by hard work and staying active, I am already getting a group of friends together to start on our own projects and short films with those who also have an interest in film. I know with them and with my mentor I can work my way into the industry and soon become someone who is able to make their dream a reality.

Three Synopses:

1. In an ancient kingdom where elves ruled the land, a noble female elf has fallen in love with a human female slave, as it is forbidden they then try to escape the land and journey to live a normal life together.
2. Two young siblings, kidnapped and tortured...become twisted psychotic killers and take revenge on those that harmed them then start killing others who intrude on them or even just for fun.
3. Post apocalyptic small military group, travel around helping survivors in the wastelands before coming across a small oasis, that is not as normal as it appears to be.
