

I was told to send my footage to an editor. I sent it back to my editor. She said it was good and my mentor didn't have anything to say about the editing. So, I did work with two editors and let them do as they wanted. ALSO. In the past, when I did small film projects, I was never with my editor and let them do as they wanted. I trust them to do the best they can.

My video hasn't changed in the editing department.
